2. 针对任意网页，使用 JQuery，能够出发某一事件，写出至少三条语句，截图响应前后不同的状态

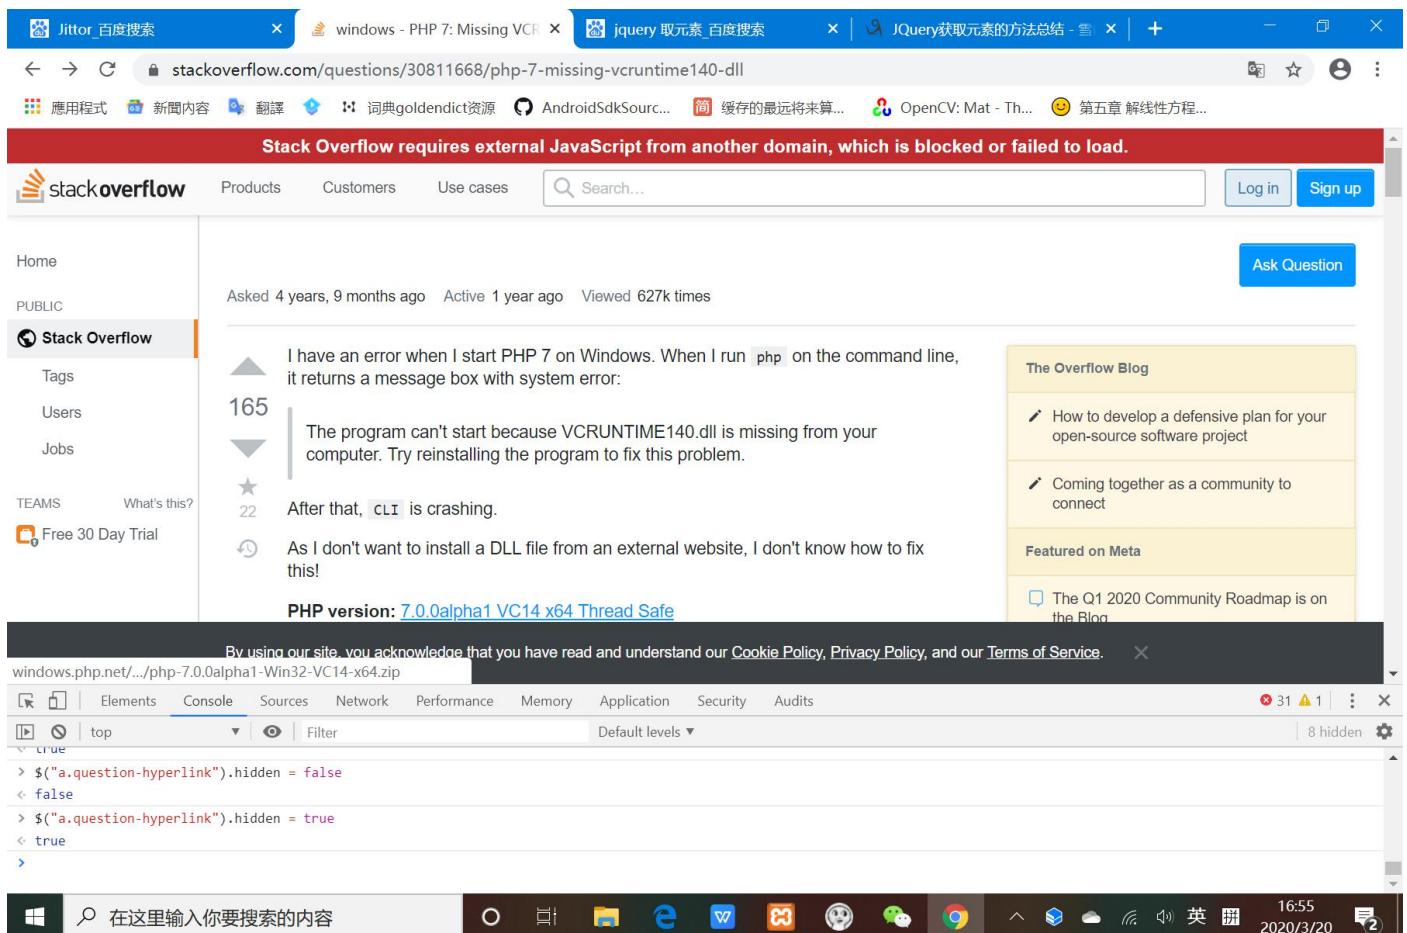

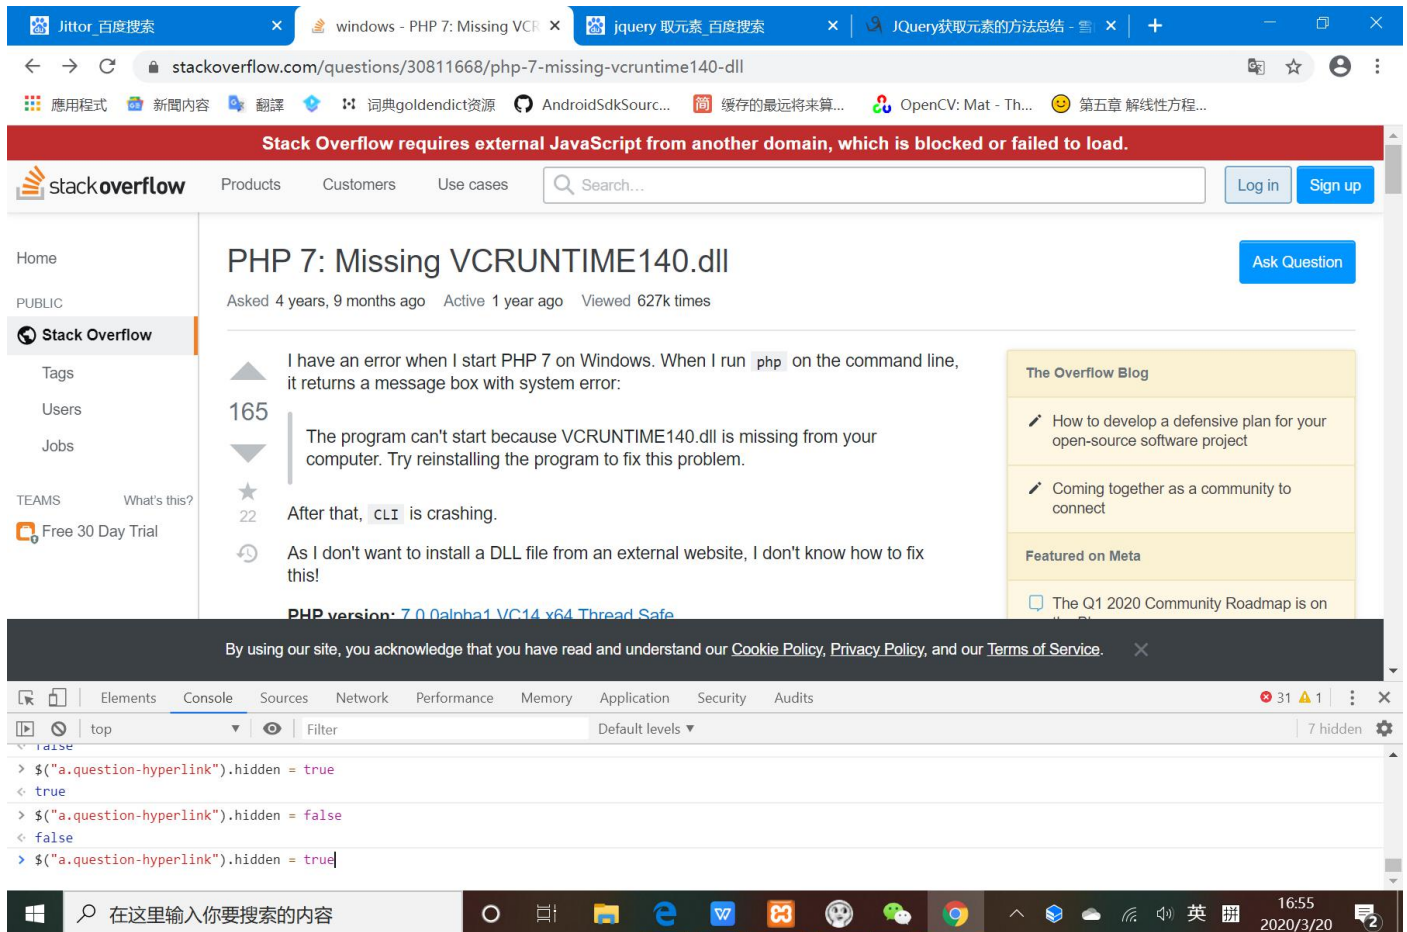

获取元素的文本内容操作

Click 操作

命令: `$("a.js-gps-track").click()`

操作前

3. 插件设计与实现

功能：提取学校网站中学员信息页有无和出国交流有关的信息，并提取链接，展示在 popup 中。

这样就不用我一条条找了。

代码如下

Manifest 中：

```
{
  "manifest_version": 2,
  "name": "getter",
  "version": "0.0.18",
  "description": "none",
  "icons": {
    "16": "16.png",
    "32": "32.png",
    "64": "64.png"
  },
  "browser_action": {
    {
      "default_icon": "32.png",
      "default_title": "demo",
      "default_popup": "popup.html"
    },
    "background": {
      "scripts": ["background.js"]
    },
    "content_scripts": [
      {
        "matches": ["<all_urls>"],
        "js": ["jquery-2.0.0.min.js", "content-script.js"],
```

```

        "run_at": "document_start"
    }
]
}

```

Content-script 中 核心代码，消息响应函数

```

chrome.extension.onMessage.addListener(
    function (request, sender, sendResponse) {
        if (request.action === "copy") {
            var addr, info;
            //var ctrl = $("#sb_form_q");
            var ctrl = $(".text-align-title");
            if (ctrl.length > 0) {
                for(var i = 0; i < ctrl.length; i++){
                    if (ctrl[i].innerText.indexOf("奖学金") != -1){
                        var parentHTML = ctrl[i].parentElement.outerHTML;
                        var href1 = parentHTML.indexOf(".href=")+7;
                        var hrefr = parentHTML.indexOf(";\"")-1;
                        var partadd = "https://cc.nankai.edu.cn/";
                        var partadd2 = parentHTML.substring(href1, hrefr);
                        if(partadd2.indexOf("page.htm")!= -1){
                            partadd2 = partadd+partadd2;
                        }else{
                            continue;
                        }
                        addr=partadd2;
                        info = ctrl[i].innerText
                        break;
                    }
                }
                //alert(addr);
                if (sendResponse) sendResponse({addr:addr, info:info});
            } else {
                alert("No data");
            }
        } else if (request.action === "paste") {
            var ctrl = $("#input");
            if (ctrl.length > 0) {
                ctrl.val(request.data);
                sendResponse("OK");
            } else {
                alert("No data");
            }
        }
        return true;
    }
);

```

Popup 中，两个按钮，点击 get 进行提取

```
$(function () {  
    $("#btnCopy").click(function () {  
        chrome.tabs.query({ active: true, currentWindow: true }, function (tabs) {  
            chrome.tabs.sendMessage(tabs[0].id, { action: "copy" }, function (response) {  
                var win = chrome.extension.getBackgroundPage();  
                win.data=response;  
                var div = document.getElementById("main");  
                var linkTmp = document.createElement("a");  
                linkTmp.href = win.data.addr;  
                linkTmp.innerText = win.data.info;  
                linkTmp.target = "_blank";  
                div.appendChild(linkTmp);  
                console.log(response);  
            });  
        });  
    });  
    $("#btnPaste").click(function () {  
        var win = chrome.extension.getBackgroundPage();  
        if (win.data) {  
            chrome.tabs.query({ active: true, currentWindow: true }, function (tabs) {  
                chrome.tabs.sendMessage(tabs[0].id, { action: "paste", data: win.data }, function (response) {  
                    console.log(response);  
                });  
            });  
        }  
    });  
});
```

Background 中

```
window.data = null;
```
